OUR COMPANY

COMPEX's team is highly educated and trained on Microsoft and Novell operating systems, major accounting systems, major database systems and all brands of Personal Computers (PCs). Our approach to business services is to meet today's needs without compromising the resources of future generations. Our goal is to promote progressive approaches to business and life.
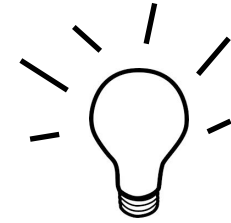

OUR PHILOSOPHY

Our philosophy includes working to achieve lower costs of doing business by reducing both physical waste and process waste, by offering current green and new green technologies and by offering services that improve the life of business as well as the business of life.
